

COOKIE POLICY

We respect your privacy and are committed to ensuring that you are properly informed as to how your cookies can be managed.

What do cookies mean?

Small data files are cookies. The site sends a cookie to your computer when you visit a website. It's stored on your computer in a file located inside your web browser.

Viruses or malware are not transferred by cookies to your computer. Because when it travels back and forth, the data in a cookie does not change, it has no way to influence how your computer runs, but they act more like logs (i.e. they record user activity and remember stat-full information) and they are updated whenever you visit a website.

By accessing cookies sent via our website, we may obtain information about you. Various forms of cookies keep track of various activities. Session cookies, for example, are only used when a person is actively navigating a website. The session cookie disappears once you leave the website. Please read the relevant section below for a more detailed list of cookies we use.

Why would cookies be useful?

To analyze how visitors use our website, we use functional cookies, as well as track and improve the performance and function of our website. By quickly identifying and fixing any problems that may arise, this allows us to provide a high-quality customer experience. For instance, we may use cookies to keep track of which website pages are most popular and which link method is most effective between website pages. The latter also allows us to track if another website has referred you to us and to enhance our future advertising campaigns.

Another use of cookies is to store your login in sessions, which means that a 'session cookie' is set when you login to the Client's Cabinet to deposit funds so that the website recalls that you have already logged in. If the website has not set this cookie, as you progress through the funding process, you will be asked for your login and password on each new page.

Furthermore, for example, functional cookies are used to enable us to remember your preferences and to identify you as a user, to ensure that your information is safe and that it operates more reliably and efficiently. Cookies, for example, save you the difficulty of entering your username every time you access our trading platform, and remember your preferences, such as the language you want to see when you log in.

Here is an overview of some of the functions provided to us by our cookies:

- Verification of your identity and detection of the country from which you are currently visiting
- Checking the type and device of the browser
- Tracking from which site the user has been referred to
- Allowing third parties to appropriately customize content

Type of cookies we use

- **Functional cookies:** For the operation of our website, these cookies are essential. Our sites would not work properly without these cookies. These are saved as login information temporarily and expire once the browser is closed.
- **Analytical cookies:** The information provided by analytical cookies enables us to analyze visitor behavior patterns and we use that information to improve the overall experience or to identify areas that may require maintenance of the website. This information is anonymous (i.e. it can not be used to identify you and does not contain any personal information, such as your name or email address) and is used for statistical purposes only. Behavioral cookies are comparable to analytical cookies and remember that you have visited a website and are using that information to provide content tailored to your interests.
- **Promotional cookies:** These cookies are used across websites to track visitors. The aim is to display advertisements that are relevant and engaging to the individual user and thus more valuable to publishers and advertisers from third parties.
- **Preferences cookies:** Preference cookies allow a website to remember information that, like your preferred language or the region you are in, changes the way the website behaves or looks.

Administrate Cookies

By using the settings in your web browser, you can remove cookies any time you want. You can also choose to disable cookies from your web browser, but this means that if you do this, our website and other websites may not function properly, and you may not be able to log in as a result. You can find further information about deleting or controlling cookies at www.aboutcookies.org.

Browser settings Do Not Track (DNT), is a feature offered by some browsers that sends a signal to websites, when enabled, to request that your browsing is not tracked, such as ad networks, social networks and analytical companies from third parties. Currently, this website does not respond to DNT requests.

Additional Details

Please contact support@hextraprime.com if you have any specific questions or concerns concerning cookies.

We are committed to maintaining the security of your personal information. Please read our Privacy Policy for more information on how we handle your data.
